

Primary Care Activity Data

CorEvitas' Vantage platform provides users with the ability to interrogate patient activity in the primary care setting. The anonymised, local-level dataset enables the safe and secure exploration of diagnosis, treatment, demographics and more across England.

Data Coverage

Map to Integrated Care Systems (ICS), Integrated Care Boards (ICB) and Primary Care Networks (PCN)

Patients are distributed across ICSs in England; see the regional coverage map below detailing patient numbers between 2018 – 2024.

Data points

Patient Demographics
Age, Gender, Ethnicity, IMD metrics, Location (National / Region / ICS / ICB, Place and PCN).

Symptoms and Diagnoses
Patient history, including the number of consultations and types of visit.

Treatment and Prescriptions
Prescriptions and therapies including pack size & dosage instructions where available.

Tests and Measurements
Tests if recorded in patients' GP EHR are captured.

Referrals
Explore referrals counts and types across primary care.
